KERALA'S LARGEST JOB FAIR

Reboot '23 is a must-attend event for anyone looking for job opportunities in the IT industry in Kerala.

Welcome to Reboot '23, the 5th iteration of Kerala's largest job fair organized by the Calicut Forum for Information Technology (CAFIT). Reboot '23 features more than 60 IT companies, with more than 1000 vacancies waiting for potential candidates. The job fair presents a golden opportunity for job seekers in the IT industry. The participating IT companies are from Govt Cyberpark, UL Cyberpark, Hilite Business Park, and Kinfrat IT Park, amongst other individual IT companies in the Malabar region.

Last year's event, CAFIT Reboot '22, saw over 13,000 candidates participate, with CAFIT managing to provide more than 800 jobs.

More than 60 IT companies are

participating this year, offering over 1000 jobs. The event provides an excellent platform for job seekers to explore opportunities in the IT industry and interact with recruiters. In addition to job opportunities, the event also allows candidates to learn about the latest trends, innovations, and technologies in the IT industry. This provides an opportunity for participants to gain insights and stay updated on the latest developments in the industry.

Reboot '23 is a must-attend event for anyone looking for job opportunities in the IT industry in Kerala. With its vast array of opportunities and the chance to interact with recruiters from various companies, the event is an excellent platform for job seekers to take their careers to the next level.

I am extremely thrilled to announce the forthcoming of our flagship initiative, Reboot 2023, a vision for the future with the goal of fostering a community of IT professionals in the Malabar region. Since its inception in 2016, Reboot has played a pivotal role in connecting aspiring learners with renowned organizations to create a robust IT resource pool in the region. The programme's resounding success has enabled thousands of students to secure promising career prospects in the dynamic IT industry.

Reboot 2023 has garnered interest from 65+ reputable organizations located in Cyberpark & CAFIT. As we look ahead to the future, we are excited to see what it has in store for us. By providing a platform that connects learners with top companies, industry experts, & growth opportunities, we believe we can create a thriving IT community that will drive innovation and growth in the region. We are delighted to have you attend the event and partner with us to shape a more promising future for the IT industry.

ABDUL GAFOOR
PRESIDENT
**Calicut Forum for Information Technology
(CAFIT)**

As a trailblazer in the use of information technology for development, Government Cyberpark Kozhikode has bridged the digital divide and empowered the common person. The city too boasts a world-class infrastructure - an international airport, a seaport and reputed institutions - making it a dream destination for IT investors. Government Cyberpark is a unique business model with a quality IT space in Plug & Play module and Warm Shell Option on lease terms spread over 2,88 Lakh sq. ft.

Envisioned and conceptualized as a major IT hub catering to the northern part of Kerala, Government Cyberpark, Kozhikode provides state-of-the-art infrastructure suitable for an IT ecosystem. It also creates direct & indirect job opportunities parallelly contributing to the economic development of the state. It has also given the youth of the area better job opportunities.

Over 2000 employees are working from 85 companies based out of the Government Cyberpark. The advent of Government Cyberpark has also created indirect employment for many thousands more. The future is bright for Government Cyberpark.

Smt. MADHAVIKUTTY M S IAS
CHIEF EXECUTIVE OFFICER,
CYBERPARK

Government Cyberpark in Kozhikode is a unique business model that envisions a state-of-the-art, world-class office atmosphere for young talents in North Kerala. Over the years, Govt. Cyberpark has created direct job opportunities and contributed to the economic development of the state. And that is not all, the Govt. Cyberpark is in expansion mode and now plays host to over 85+ companies and counting.

VIVEK NAIR
GENERAL MANAGER,
GOVT. CYBERPARK

Promoting IT Entrepreneurship in Malabar.

CAFIT, or Calicut Forum for Information Technology, is a non-profit organization established in 2008 with the aim of promoting a conducive ecosystem for IT entrepreneurship in the Malabar region. It is a self-funded and independent movement focusing on SMEs and startup growth in Calicut.

CAFIT aims to introduce new trends and knowledge to its members. It acts as an advisory body by offering its collective experience, enabling companies to drive their enterprises with greater operational efficiency and achieve their business objectives. Its mandate is to promote Malabar as an ideal destination for technology entrepreneurship. By structuring programmes that increase the chances of success among young entrepreneurs and startups through training, mentoring, and funding, CAFIT helps support the country's economic growth.

Thanks to its founders and members, CAFIT has been striving to transform a conservative Malabar into a technology hub that upholds traditional values. Today, CAFIT can proudly say that it has been instrumental in bringing technology attention to Kozhikode.

KERALA KNOWLEDGE ECONOMY MISSION

The Kerala Development and Innovation Strategic Council (K-DISC), a state government think tank body task with promoting innovation in Kerala, has been working to build a framework of education, training, skilling and employment that would make every desirous and eligible person, regardless of whether they are job-seeking youth, homemakers, career break professionals or persons with vulnerabilities, entitled to get trained in technologies related to subject areas of their choice and use such knowledge to secure gainful employment. As an outcome, Kerala Government has

embarked on an audacious programme of Kerala Knowledge Economy Mission (KKEM), with a vision to develop Kerala into a Knowledge Society and thereby achieve economic growth and lifestyle improvements for its citizens. By 2026, KKEM aims to offer gainful employment to 20 lakh people across a variety of sectors and job areas.

KKEM aims to create knowledge-based career opportunities for job seekers in Kerala and the job seekers will be offered vacancies including full-time and part-time jobs, projects and freelance jobs, and remote work in the private, MSME, and start-up sectors.

KEY STRATEGIES

DIGITAL WORKFORCE MANAGEMENT SYSTEM (DWMS)

Digital Workforce Management System (DWMS) is a platform of platforms has been designed with the support of the Digital University of Kerala as an online digital platform to connect job seekers and job providers. Thus, the DWMS will act as a comprehensive platform that takes care of the supply and demand side with capabilities for registration of candidates seeking jobs, curation of registered candidates to meet the demand as well as job publisher registration.

(OVERALL DATA TO BE GIVEN WITH CLIPARTS)

11 Lakhs + Job seekers | 200+ Talent seekers | 6000+ Works and Projects
150+ Trained Talents | 180+ Skill courses | 25+ Sectors | 30+ Skill Providers

DEMAND AGGREGATION - JOBS

The demand side jobs are being aggregated and curated to the KKEM - DWMS portal and made accessible to the job seekers registered in the DWMS portal as per their interest on a daily basis. KKEM has taken steps to tie up and collaborate with the leading job providers and industry associations to strengthen the demand side as well as to pool in gig and remote works.

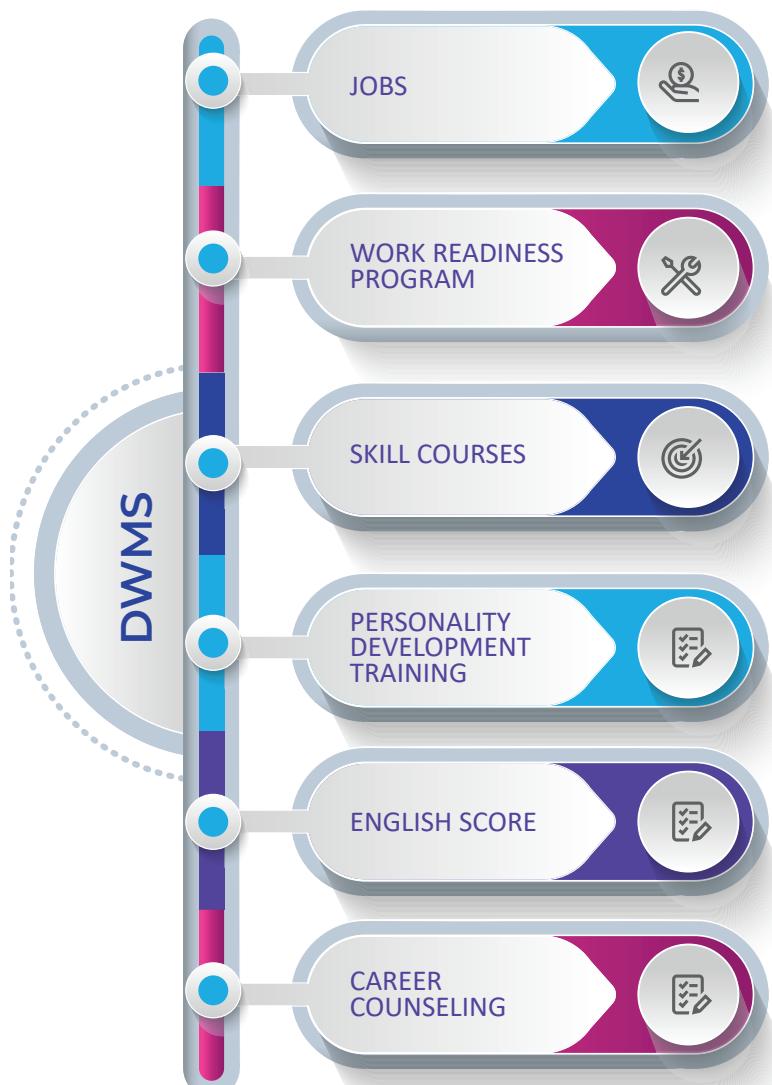

SKILL PROGRAMS

SKILL TRAINING: KKEM has partnered with different skill providers such as Skill training agencies, Higher Education Institutions and Universities across the state and made available the demanding skill courses into the DWMS platform for the job seekers who are interested in skilling, upskilling and reskilling.

INTERNSHIP: Industry internships support the students of higher education institutions to plug the gap between the theoretical knowledge they gain from the classrooms and the actual practical skills required in the actual workplace scenario. Internships act as a bridge from formal education to the actual workplace.

RTD (Recruit, Train and Deploy): Recruit Train and Deploy training program helps to employ local resources for niche skills and be trained by the industry as per the demand of the job roles. The training curriculum is developed by the industry for short duration and as per the required talent set.

APPRENTICESHIP: Lack of hands on experience or industry exposure is one of the major reasons for unemployment among educated population. Apprenticeship is one of the major area which will impart hands on training and will drive to an effective placement mechanism.

CAREER SUPPORT PROGRAMS

ROBOTIC INTERVIEW

All job aspirants can enrich their profiles and specify their preferences by taking an AI-based Robotic Interview. Therefore, they are also more likely to find a job that is a perfect fit for their preferences and abilities. A robotic mock interview is conducted on the DWMS platform to create a video profile of the job seeker. It will be a 3-minute video interview, during which the video will be recorded and made available to prospective employers to help them narrow down the candidates.

CAREER COUNSELLING

A psychometric test is conducted to create the most accurate profile of a candidate. A better fit between your character traits and your career will result in better job performance and satisfaction. People must be given the right assessment, informed about themselves, and guided towards the right courses and careers. Using the assessment, one can gain a deeper understanding of one's core behaviour, strengths, weaknesses, behavioural patterns, and more. The job seeker can avail the service of a career counsellor for a better understanding of their career paths.

ENGLISH SCORE TEST

Job seekers are also given an English Score Assessment, an app-based English proficiency test, to assess their level of

proficiency. English Score is an online test developed by the British Council that measures English proficiency using the Common European Framework of Reference (CEFR). Job seekers have the option of testing their English language level as many times as they wish for free via a smartphone app-based online test from their profile. A certificate can be downloaded once for free.

PERSONALITY DEVELOPMENT TRAINING

The Personality Development Training (PDT) module is designed to help job seekers improve their workplace communication, interpersonal skills, and overall personality development. The training is intended for job seekers who wish to enhance their language skills and professional abilities. Through the DWMS, job seekers can choose a convenient time slot for 16 hours of online communication training.

WORK READINESS PROGRAMME

KKEM offers a work readiness program to job seekers before their final interview. The DWMS portal offers a free work readiness programme to job seekers before the actual placement process. The module includes 15 hours of offline grooming sessions to improve their interview skills and train them on interview etiquettes, confidence building, group discussions, mock interviews, etc., which will help them attend interviews confidently. Offline training is conducted over three days for five hours each. The job seeker can select a convenient time slot on the DWMS for training.

#capio

CAPIO INTERACTIVE

A Behaviourally Informed Creative Design Agency

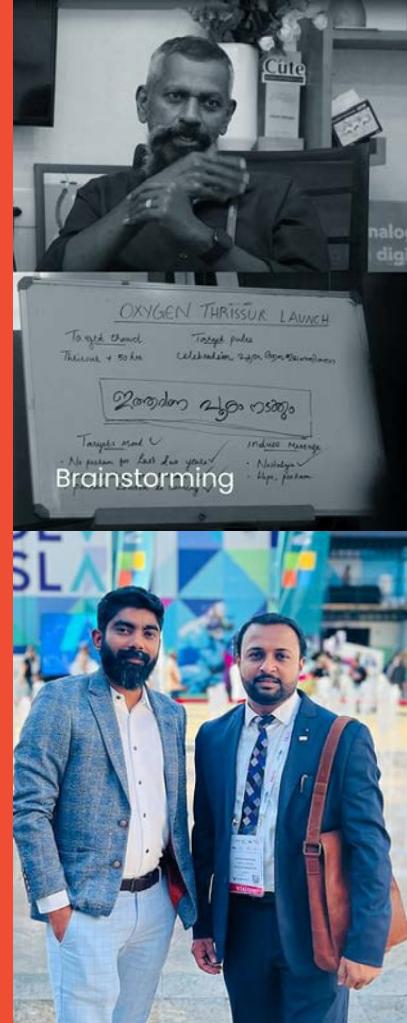

Capio Interactive, established in 2012, has grown over the last decade into one of the leading agencies in the region. With a strong portfolio for brand identity design, product packaging, and 360-degree ad campaigns, the agency has served over 100+ brands and completed more than 250+ campaigns.

Capio's expertise in the industry has been recognized through various awards, including India's prestigious advertising awards, Bigbang and Pepper Awards. These awards prove the agency's commitment to delivering innovative solutions and exceptional brand experiences for its clients.

The testimony of Capio's work comes from its beloved clients, who have appreciated the agency's approach and the results it has delivered. Mr. Shijo Thomas, CEO of Oxygen Digital, shares his experience with Capio,

saying that they have worked with many agencies in the past, but were never fully satisfied with their marketing until they associated with Capio. Recently, Capio delivered two successful campaigns for their Thrissur and Kottayam showroom launch, both of which were superhits.

Another satisfied client, Mr. Ibrahim P, Chairman of Beautymark Gold & Diamonds, talks about their experience with Capio during their company's rebranding. After searching for the right agency for almost two years, they were referred to Capio by some business owners. Capio asked them the right questions and educated them about rebranding, providing them with a detailed brand identity design. Mr. Ibrahim P also praised Capio's internal system for managing works and providing consistent timely creatives.

Capio's approach is to combine creativity with science. The agency believes that to create successful campaigns, it is essential to understand consumer behaviour, and that's where behavioural science comes into play.

#capio

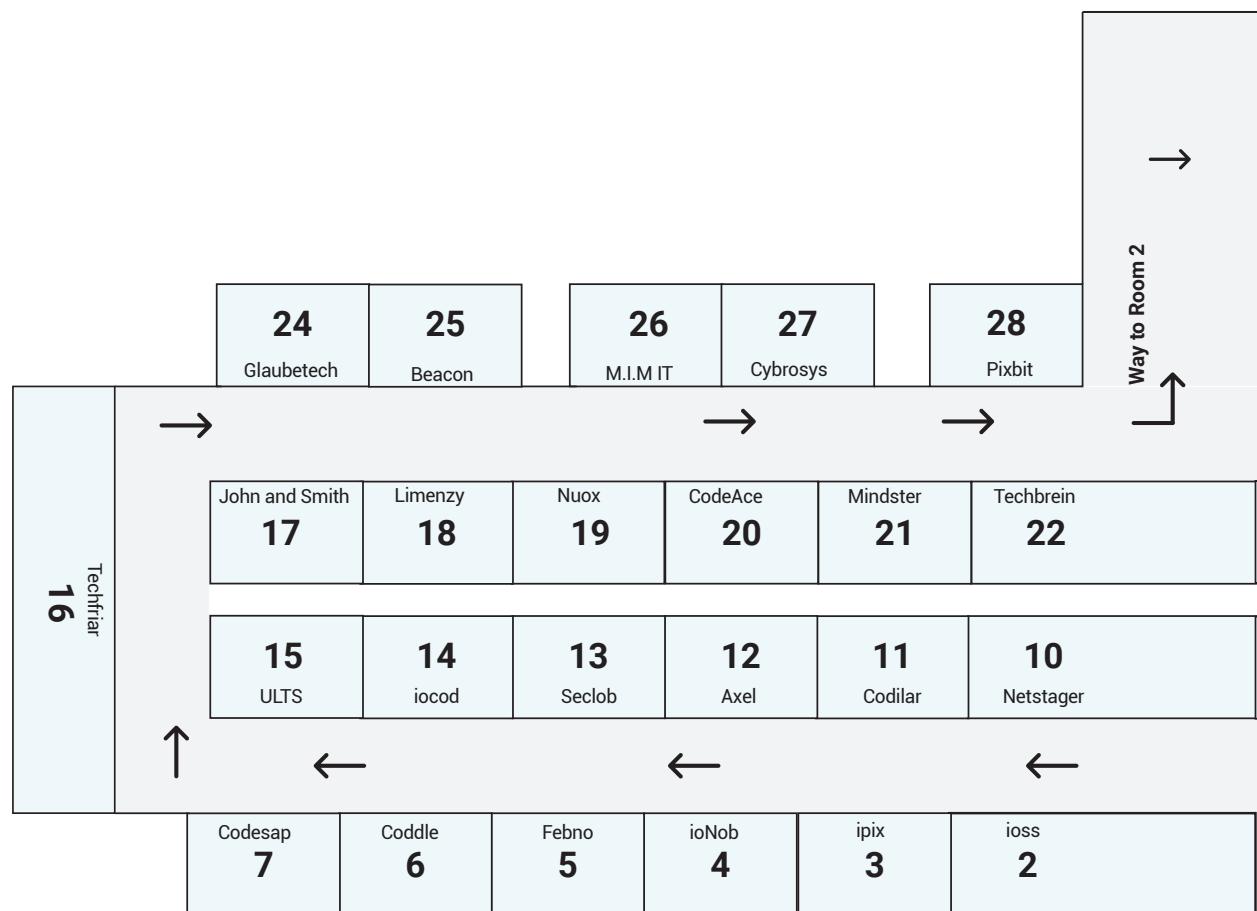

He highly recommends Capio's services to businesses looking for an experienced ad agency.

In 2021, Capio started its behavioural science journey and is continuously learning to apply behavioural science concepts and principles into its works. As a behaviourally informed creative design agency, Capio strongly foresees it as the future of advertising.

Currently, the agency has a combined strength of 50 teammates who are well-versed in their respective domains, and they work together to create exceptional brand experiences for their clients. Capio's expertise lies in creating memorable brand identities that resonate with the target audience, designing product packaging that stands out on the shelves, and crafting ad campaigns that evoke the right emotions.

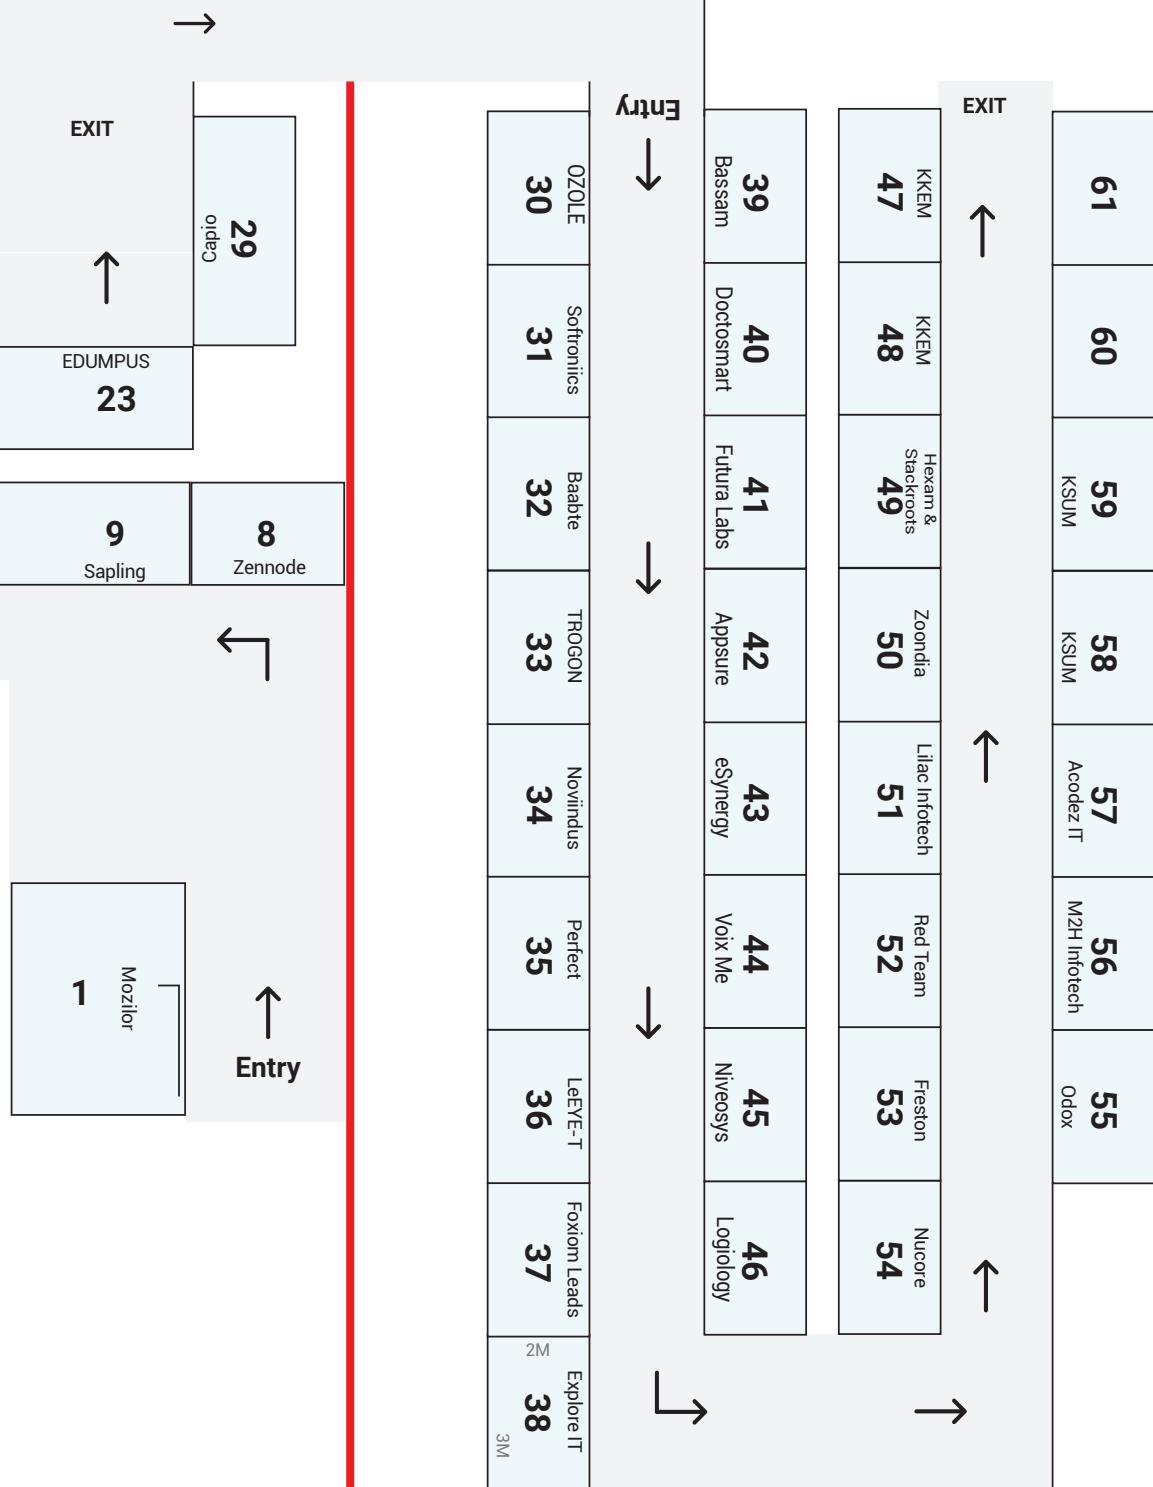

Capio's approach is to combine creativity with science. The agency believes that to create successful campaigns, it is essential to understand consumer behaviour, and that's where behavioural science comes into play. By leveraging behavioural science principles, Capio's campaigns are designed to elicit specific emotions and behaviours in the target audience, which ultimately leads to better conversion rates for the brands.

Capio Interactive is a behaviourally informed creative design agency that combines creativity with science to create exceptional brand experiences for its clients. With a decade of experience and a strong portfolio, Capio is well-positioned to deliver outstanding results for its clients. As the agency continues to learn and evolve with behavioural science, it is confident that it will lead the future of advertising.

"Your work is going to fill a large part of your life, and the only way to be truly satisfied is to do what you believe is great work. And the only way to do great work is to love what you do. If you haven't found it yet, keep looking. Don't settle. As with all matters of the heart, you'll know when you find it."

Laravel Laravel is a popular open-source PHP web application framework with 70k+ stars in github, known for its simplicity, robustness, and elegant syntax. It offers a modular architecture powerful ORM, flexible routing, simple Blade templating engine, and robust security features. With a large community of developers, Laravel is considered the future of web development.

Learn more : iocod.com/laravel

Vue.js Vue.js is a popular JavaScript framework that simplifies web application development. It offers a reactive and declarative approach to building user interfaces, with features such as data binding, directives, components, and virtual DOM. Vue.js is lightweight and flexible, making it a preferred choice among developers.

Learn more : iocod.com/vuejs

Flutter Flutter is a mobile application development framework created by Google. It allows developers to build natively compiled applications for mobile, web, and desktop using a single codebase. Flutter uses Dart programming language and offers a rich set of pre-built widgets and tools. With hot reload feature, it is easy to experiment, build UIs, add features, and fix bugs in real-time.

Code Ace: An Ideal Space For The Young And Passionate

CodeAce operates two offices at Cyberpark, Kozhikode, and a third office in Texas, United States with plans for a fourth in the U.A.E.

Code Ace IT Solutions LLP is one of the leading performance marketing companies in the country, serving clients from America and Europe.

We support premium brands, large businesses, and startups on innovation, through thoughtful design, and optimization of marketing and advertising strategies.

We also own and operate over 20 brands and more than 350 websites with a core group of talented individuals including SEO analysts, content creators, graphic artists, video creators, designers, and developers.

A business empire in the making

CodeAce operates two offices at Cyberpark, Kozhikode, a third office in Texas, United States, and plans are well underway for a fourth in the U.A.E. SoulFactors, Brokees, Adorav, and Upplittathu, are just a few of the flagship brands of our company making waves in the industry.

Trend-setters in work-space innovation

CodeAce is a space that invites young aspirants who want to learn, earn, and grow. We offer the industry-best salary and incentive packages and also have an inclusive work culture where every member of the team is equally valued and every effort is rewarded. The higher-than-average employee retention rates compared to industry standards and the numerous high achievers the company has produced over the years exemplify what it means to be a Code Aceian.
